

## **ABSTRACT OF THE DISCLOSURE**

5 A molding remover system for efficiently removing door molding from a  
6 vehicle without requiring removal of the door glass. The molding remover system  
7 includes a handle and a shaft member extending from the handle. The shaft member  
8 has an engaging portion that extends toward the handle. The engaging portion is  
9 formed for engaging a retainer clip attaching a window molding to a door frame.
